GENERAL CONDITIONS:

The Applicant, its successors, grantees and assigns shall assume all risks and liabilities for all accidents and damages that may occur to person or property as a result of the work associated with this permit. The Highway Authority shall have unrestricted access to inspect the Applicant’s work at all times. Furthermore, the Applicant agrees:

1. To comply with all applicable federal, state and local laws, rules, regulations and ordinances associated with the type of utility installation that is being performed, and
2. To secure permission from abutting or adjacent property owner or owners where required, and
3. To maintain, relocate or remove the utility installation described in this application when so ordered by the Highway Authority, and
4. To repair the disturbed area to its original condition, and
5. To install the utility by directional boring methods at all locations within six feet of the roadway surface unless open-cut trenching is specifically allowed by the Special Conditions below, and
6. To perform all work in such a manner that no hindrance or hazard is offered to public traffic, unless road or lane closures are specifically allowed by the Special Conditions below, and
7. To comply with the following Special Conditions as required by the Highway Authority:

SPECIAL CONDITIONS: (To be completed by the Highway Authority)

The following Special Conditions are required or allowed by the Highway Authority granting this Permit:

1. Overhead utility installations shall have at least _____ feet of clearance above the traveled roadway.
2. Underground utility installations shall have at least _____ inches of earth cover, measured from the top side of the uppermost utility line to the lowest finished ground elevation over the utility line.
3. Open-cut trenching across the roadway or within 6 feet of the edge of the roadway surface will only be allowed if initialed at right by the Highway Authority: _____ .
 - a. In open-cut trenches, the utility line shall be embedded in sand or other approved granular material from the bottom of the trench to a cover height of 12” above the utility line.
 - b. The remainder of the trench, at all locations beneath the roadway or within 2 feet of the edge of the roadway surface, shall be filled with CA-6 road rock, compacted in successive lifts with a jumping jack or other approved compactor in lifts not exceeding 12” thickness.
4. Open-cut trenches in the ditch bottom, foreslope or backslope areas, between the roadway shoulder and right-of-way line, shall be filled with compacted clay or other approved material.
5. The entire road may be closed if initialed at right by the Highway Authority: _____.
6. A single traffic lane may be closed if initialed at right by the Highway Authority: _____.
7. If a road or lane closure is allowed, the applicant agrees to provide all necessary signs, cones, certified flaggers, flashing lights and any other precautions as needed to protect public traffic.
8. If road or lane closures are allowed, the maximum closure time shall be _____ hours.
9. Other Special Conditions: _____
